Summary

Enthusiastic software developer eager to contribute to team success through hard work, attention to detail, and excellent organizational skills. Clear understanding of programming and problem-solving and training in C, HTML, CSS, Javascript, and other tools and frameworks. Motivated to learn, grow and excel in the tech industry.

Projects

Diabetes Tracker | Angular
- Developed a dynamic website which is able to track a user's sugar levels, their food intake, and plot a graph for all their inputs accumulated overtime.
- Used MongoDB as the database to store the clients credentials and the user's sugar levels over a period of time.
- Used Tokens to store user session.
- Created various components and routes and added route guards to protect various routes.
- Implemented 404 page with images loaded dynamically from Dog API.
- Added dark mode for better user experience.

Tweet Manager | C
- Designed a tweet manager in C using linked list which is able create a tweet, display all tweets that are created, and much more.
- Able to search through tweets for a particular keyword and count the number of stop words across all tweets gathered.
- Able to delete any tweet from the linked list and save all the tweets accumulated into a file of your choice.
- Able to load tweets from a given file and append to the existing linked list.

Experience

Wave Carriers - Logistics Specialist
Brampton, ON
08/2018 - 01/2020

- Provided transport logistics needs to consumers.
- Found freight loads for importing/exporting goods.
- Provided customer care to consumers regarding freight issues.
- Negotiated with buyers/sellers for competitive freight rates.

Amazon - Ambassador
Brampton, ON
06/2017 - 07/2018

- Taught and provided equipment license to new employees.
- Taught and enforced Amazon safety procedures, rules and regulations, policies, and employment benefits to new employees.
